

# zenon – the Future-Proof Alternative

zenon from COPA-DATA is the core system of the SICAM®\* 230 software. Switching from SICAM 230 to zenon is easy and brings a great deal of economic and technological benefits with it.

## EFFICIENT ENGINEERING

zenon is the core system of SICAM 230 so, when switching from SICAM 230 to zenon, existing SICAM 230 projects can mostly be used and maintained. SICAM 230 uses the zenon engineering environment, meaning that engineers who are familiar with the engineering environment from SICAM 230 can continue to make use of all their expertise when maintaining existing zenon projects or creating new ones.

## MINIMIZED RISK WHEN SWITCHING FROM SICAM 230 TO ZENON

When switching from SICAM 230 to zenon, there are practically no technical risks as zenon is the core system of SICAM 230. As the same technology is still used, there are also no economic risks and it is not necessary to obtain new certification for the equipment.

## FUTURE PROOFING

zenon is a COPA-DATA product and is therefore continuously being developed. zenon users benefit from ongoing product

maintenance, functional enhancements and worldwide support, meaning that investments in zenon are secure and can be planned in the long term.

## FUNCTIONAL ENHANCEMENTS WHEN SWITCHING TO ZENON

SICAM 230 is based on zenon version 7.20. COPA-DATA has since launched the fully compatible 7.60 zenon version onto the market, bringing some significant functional enhancements:

- ▶ Process Recorder for recording and subsequent playback of processes directly on the process screen
- ▶ Command Sequencer for automation of command sequences including graphical editor and teaching (recording of manual command operations)
- ▶ GIS integration for visualizing geo-information on the process screen
- ▶ Latest security features
- ▶ Over 300 further improvements in function and usability
